

Paediatric Life Support (pBLS) - Level 2

Course Content:

These sessions cover the syllabus outlined in the Skills for Health Framework.

- Recognise cardiorespiratory arrest and summon help
- Initiate and maintain **effective** chest compressions and lung ventilation
- Management of choking
- Know how to identify and initiate initial treatment for anaphylaxis
- Know how apply the local Do Not Attempt Cardiopulmonary Resuscitation policy

Please note that in line with the local resuscitation policy the use of an AED is not indicated in the treatment of paediatric cardiac arrest

Audience:

For staff that have direct clinical care responsibilities. Staff are expected to have level two training for the patient group for which they have responsibility for.

For example: staff who only have responsibility for paediatric patients are only required to have level 2 paediatric basic life support.

Course Delivery:

Paediatric Basic Life Support (level 2) is a blended learning session. Along with attendance to the practical learning session you must complete the '**000 Resuscitation Paediatric Level 2**' e-learning module on ESR or complete the workbook to achieve compliance with your mandatory training.

Course Lecturers:

Resuscitation Practitioners
